

1/4" – 2" (DN 8 – 50) A-STYLE MODEL D THREADED END 2000 CWP BALL VALVE

The A-Style ball valve, brings you the performance and design features you've been looking for – all in a single, low-cost valve.

This ball valve's unique design offers fire-test specifications, rugged actuator mounting and flexible-lip seats for application versatility that surpasses other ball valves.

The A-Style ball valve is available in 1/4" – 2" (DN 8 – 50) sizes rated by the traditional approach for threaded end valves. This approach determines Cold Working Pressure (CWP) based on paragraph UG101 of the ASME Boiler and Pressure Vessel Code. Accordingly, the CWP of this series is as follows:

Valve Size		CWP Rating	
inches	DN	psi	bar
1/4" – 2"	8 – 50	2000	138

A-Style valves are available in carbon and stainless steel and are rated for steam applications with Xtreme® (X), PTFE (T) and Delrin® (R) seats.

FEATURES

Reliable Bi-Directional Shutoff

- New Xtreme seat provides longer life, expanded performance boundaries and greater value.

- Polymeric flexible lip-seat design offers tight shut-off in either direction and extended cycle life with minimum maintenance.

Fire-Tested

- Fire-Tite® valves meet API 607 requirements.

NEW FEATURES AND BENEFITS

- New patented stem seal system is live loaded and engineered to assure long sealing life.
- ISO 5211 Bonnet for global conformity.
- New stainless steel linkage for VPVL, V-Series and ADC-Series actuators has a guided coupling to align topworks during assembly and eliminate side load stress on stem seals for long life, clean environment and reduced maintenance.

Rugged Valve/Actuator Interface Simplifies Automation

- Jamesbury® actuators and linkage support up to a 200 lb. load in any direction without causing actuator misalignment and consequent stem seal leakage.

XTREME PERFORMANCE & VALUE

Xtreme seats provide longer life, expanded performance boundaries and the greatest possible value. *Xtreme* is a unique material that resulted from a technological breakthrough in our polymer research lab. The material is a fluoropolymer based blend, proprietary to *Jamesbury* that provides superior quarter turn valve performance.

Valve Seat Ratings

These ratings are based on differential pressure with valve in the fully closed position and refer to seats only. Refer to valve body ratings to be sure that all components are satisfactory for the application.

Valve Body Ratings

These are maximum working pressure ratings of the valve body only. Valves in carbon steel are suitable for service to -20°F (-29°C), valves in 316 stainless steel to -60°F (51°C) (to -40°F with Delrin® seats). The preceding seat ratings determine the practical pressure limitation in actual working pressure. Ratings are at -20°F to +100°F (-29°C to +38°C).

1 1/4" – 2" (DN 8 – 50) Standard Port

Valve Size Inches	Working Pressure Rating - psi

**Jamesbury 'The Ultimate Process Automation Package'
for VPVL Pneumatic Actuators, V-Series, ADC-Series, QX-Series and I-Series Electric Actuators**

Patented stem seal (70017915) has 3 engineered sealing zones to provide multiple barriers for long term sealing.

Automation Performance and Value

A-Style valves combined with *Jamesbury* actuators offer a total value and performance package. Available with pneumatic Valv-Powr® VPVL actuators, V-Series, ADC-Series, QX-Series and I-Series electric actuators and with Stonel®

Quartz®, Eclipse®, and Hawkeye® digital monitors or VCTs, the packages have a wide range of applications. Visit our website at www.metso.com/valves.

ACCESSORIES

Bonnet Extension SE-096, 097 & 098

4" (102 mm) bonnet extensions are available for applications that require insulated pipe, particularly useful for automated products, bonnet extension can also be used to prevent interference between actuators and companion pipelines and equipment. They are ideal as extension that require locking lever or locking oval handle capability. Stainless steel construction offers the option of using the bonnet extension to enhance the carbon steel stem extension (SE-093, 094 & 095) offerings.

Stem Extensions SE-093, 094 & 095

A standard 4" (102 mm) stem extension is offered for improved accessibility, particularly when used in insulated pipelines. Stem extension kits can be ordered factory-mounted or shipped separately for field mounting.

Round Handles

Optional round handles available. To order handles separately, specify the part number shown in the accessories table below.

Oval handles with slide-lock

Optional oval handle saves space and may be pad-locked to retain the valve in the open or closed position.

Stainless steel linkages for Jamesbury ISO Actuators

- Self aligning
- Engineered for optimum stem seal performance

* Use with Delrin® seats

VALVE TORQUE DATA

These torque charts are to be used as a guide for actuator selection. Additional requirements may be imposed by media characteristics, trim, and frequency of valve operation. For clean lubricating fluid service, required torque of Xtreme (X), and PTFE (T) seated valves only may be reduced 20% when the valve is equipped with corrosion

resistant trim. For difficult services such as slurries and semi-solids, and for oxygen, increase values by 50%. *If in doubt, select the larger actuator.*

Torque output values and actuator selection tables for the different types of Jamesbury actuators are contained in the bulletins listed on Page 7.

Xtreme (X) Seated Standard-Port Valves

Delrin Seated Valves

PTFE (T) Seated Valves

Actuators

Metso offers a full line of integrally designed actuators for automated systems or for easier control of inaccessible or remote valves. Pneumatic actuators that include double-acting and spring-return piston, vane and rack and pinion units, spring-diaphragm types, and electric actuators are available for all valves. Electric actuators are available in both watertight and hazardous location models.

For further information on actuators for A-Style valves, see the following:

Flow Data

The table below provides flow coefficients of reduced port A-Style valves. The C_v values represent the flow of water at +60°F through the valve in gallons per minute at a pressure drop of 1 psi. The metric equivalent, K_v , is the flow of water at 16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm². To convert C_v to K_v multiply by 0.8569.

Valve Size		Cv	Equivalent length of pipe - ft.
Inches	DN		
1/4	8	6	.33
3/8	10	10	.61
1/2	15	13	1.5
3/4	20	33	1.1
1	25	44	2.1
1-1/4	32	46	8.4
1-1/2	40	95	4.5
2	50	111	12.0

HOW TO ORDER A-STYLE BALL VALVES

To specify a valve select the body style, the combination of body and trim material and the proper seat material for the application.

1	2	3	4	5	6	7	8
1-1/2	A	Z	—	22	36	XT	D

Example: This example is for a 1-1/2" *Fire-Tite* 2000 CWP NPT ball valve constructed of carbon steel body, stainless steel ball and stem, *Xtreme* seats, TFM seals and Model Code D.

1	Valve Size	
	Inches	DN
1/4	1/4	8
3/8	3/8	10
1/2	1/2	15
3/4	3/4	20
1	1	25
1-1/4	1-1/4	32
1-1/2	1-1/2	40
2	2	50

2	Body Style
A	1/4 – 2" (DN 8 – 50)

3	Conformance
–	Non <i>Fire-Tite</i>
Z	<i>Fire-Tite</i> to API 607

4	Special Application/Construction or Service
–	Standard
O	Oxygen
C	Chlorine
V	High Vacuum
VC	High Vacuum Certified
TG	Top Ground
STGR	Top & Bottom Ground
W	Seal Welded
